Who we are?

We are Web5 Labs, a studio dedicated to building various convenient and easy-to-use software and hardware systems for people who are interested in blockchain.

Why do this project?

We are Web5 Labs, a studio dedicated to building various convenient and easy-to-use software and hardware systems for people who are interested in blockchain. The launch of NEOX makes it easier to write contracts in solidity on Neo. It is a cause for celebration for the NEO community. NFT, as the core concept of crypto art, can link holders and creators with a low threshold. It can bring a large number of potential new users to the NEO community. The NFTX project can play an important role in this process.

Future Outlook

We are Web5 Labs, a studio dedicated to building various convenient and easy-to-use software and hardware systems for people who are interested in blockchain. The launch of NEOX makes it easier to write contracts in solidity on Neo. It is a cause for celebration for the NEO community. NFT, as the core concept of crypto art, can link holders and creators with a low threshold. It can bring a large number of potential new users to the NEO community. The NFTX project can play an important role in this process.

Keep up with the progress.

Our developers are hard at work. Stay up to date on the latest releases from the Neo X team.

< >

08/2024

Team formation, project approval, requirements determination, IP hand-drawing, development started.

09/2024

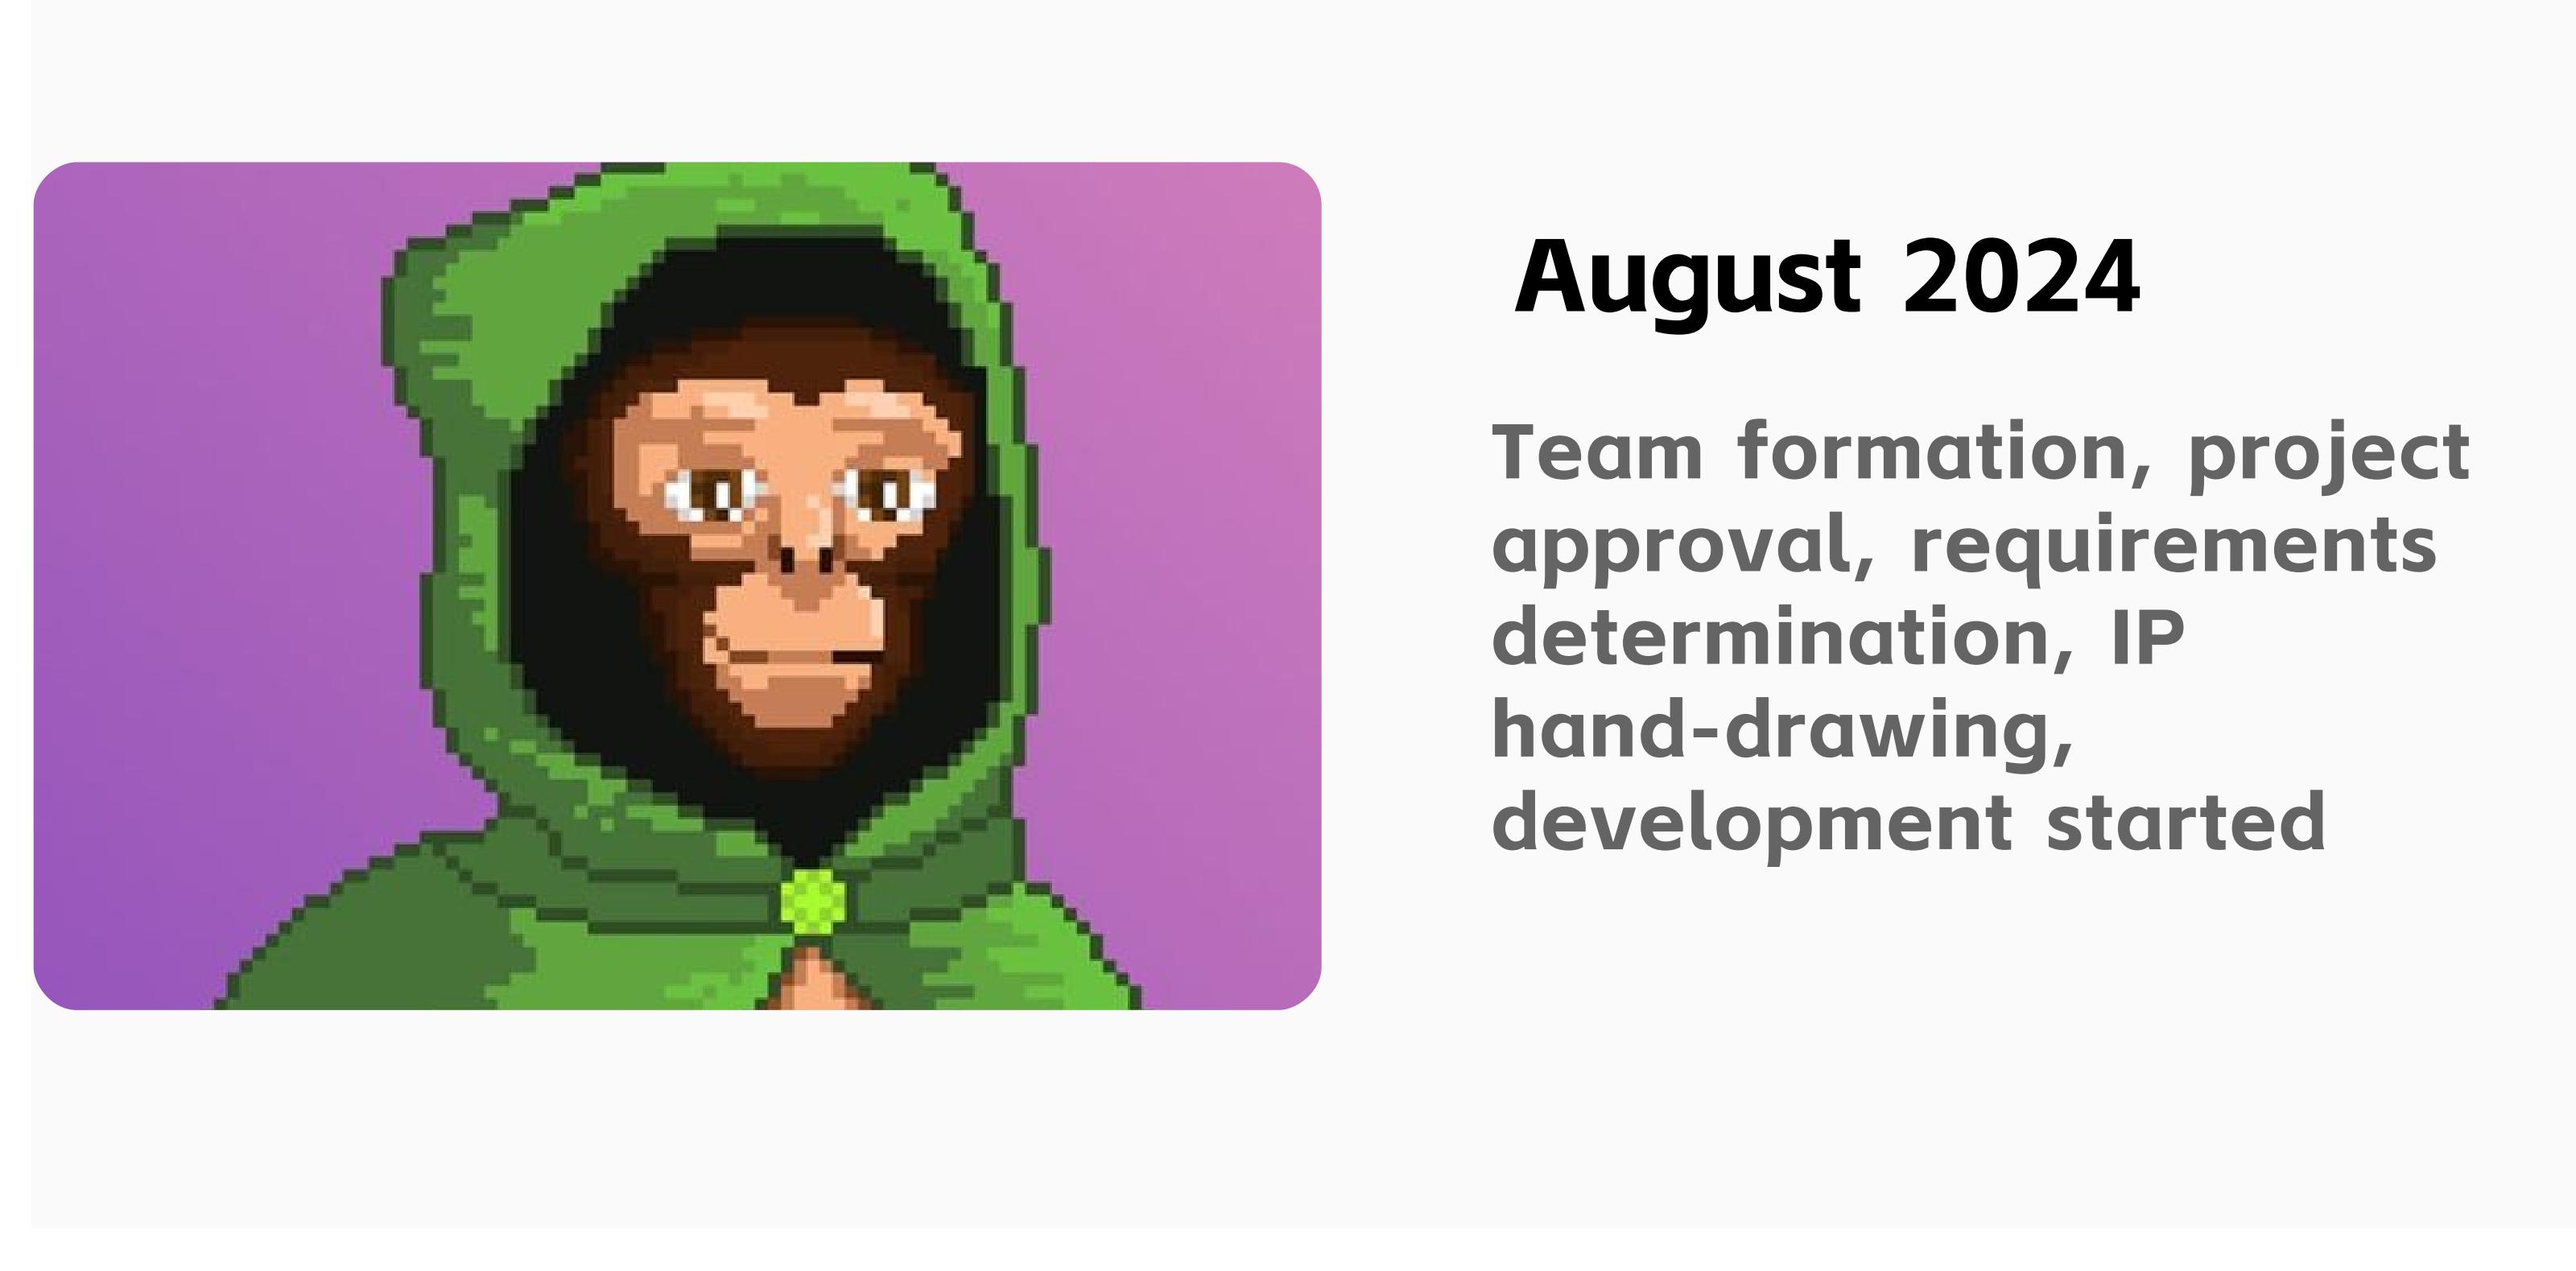

Demo launched, operation team established, inviting community artists and opinion leaders to join.

10/2024

Develop NFTX 2.0. Goal: Allow people who don't understand technology to freely import the designer's design, automatically disassemble the elements after importing, and automatically generate a page that can be minted.

12/2024

Excellent applications on the BTC network are scarce. Increase support for the BTC network. Import BTC's high-quality assets and users into NEOX.

August 2024

Team formation, project approval, requirements determination, IP hand-drawing, development started

September 2024

Demo launched, operation team established, inviting community artists and opinion leaders to join

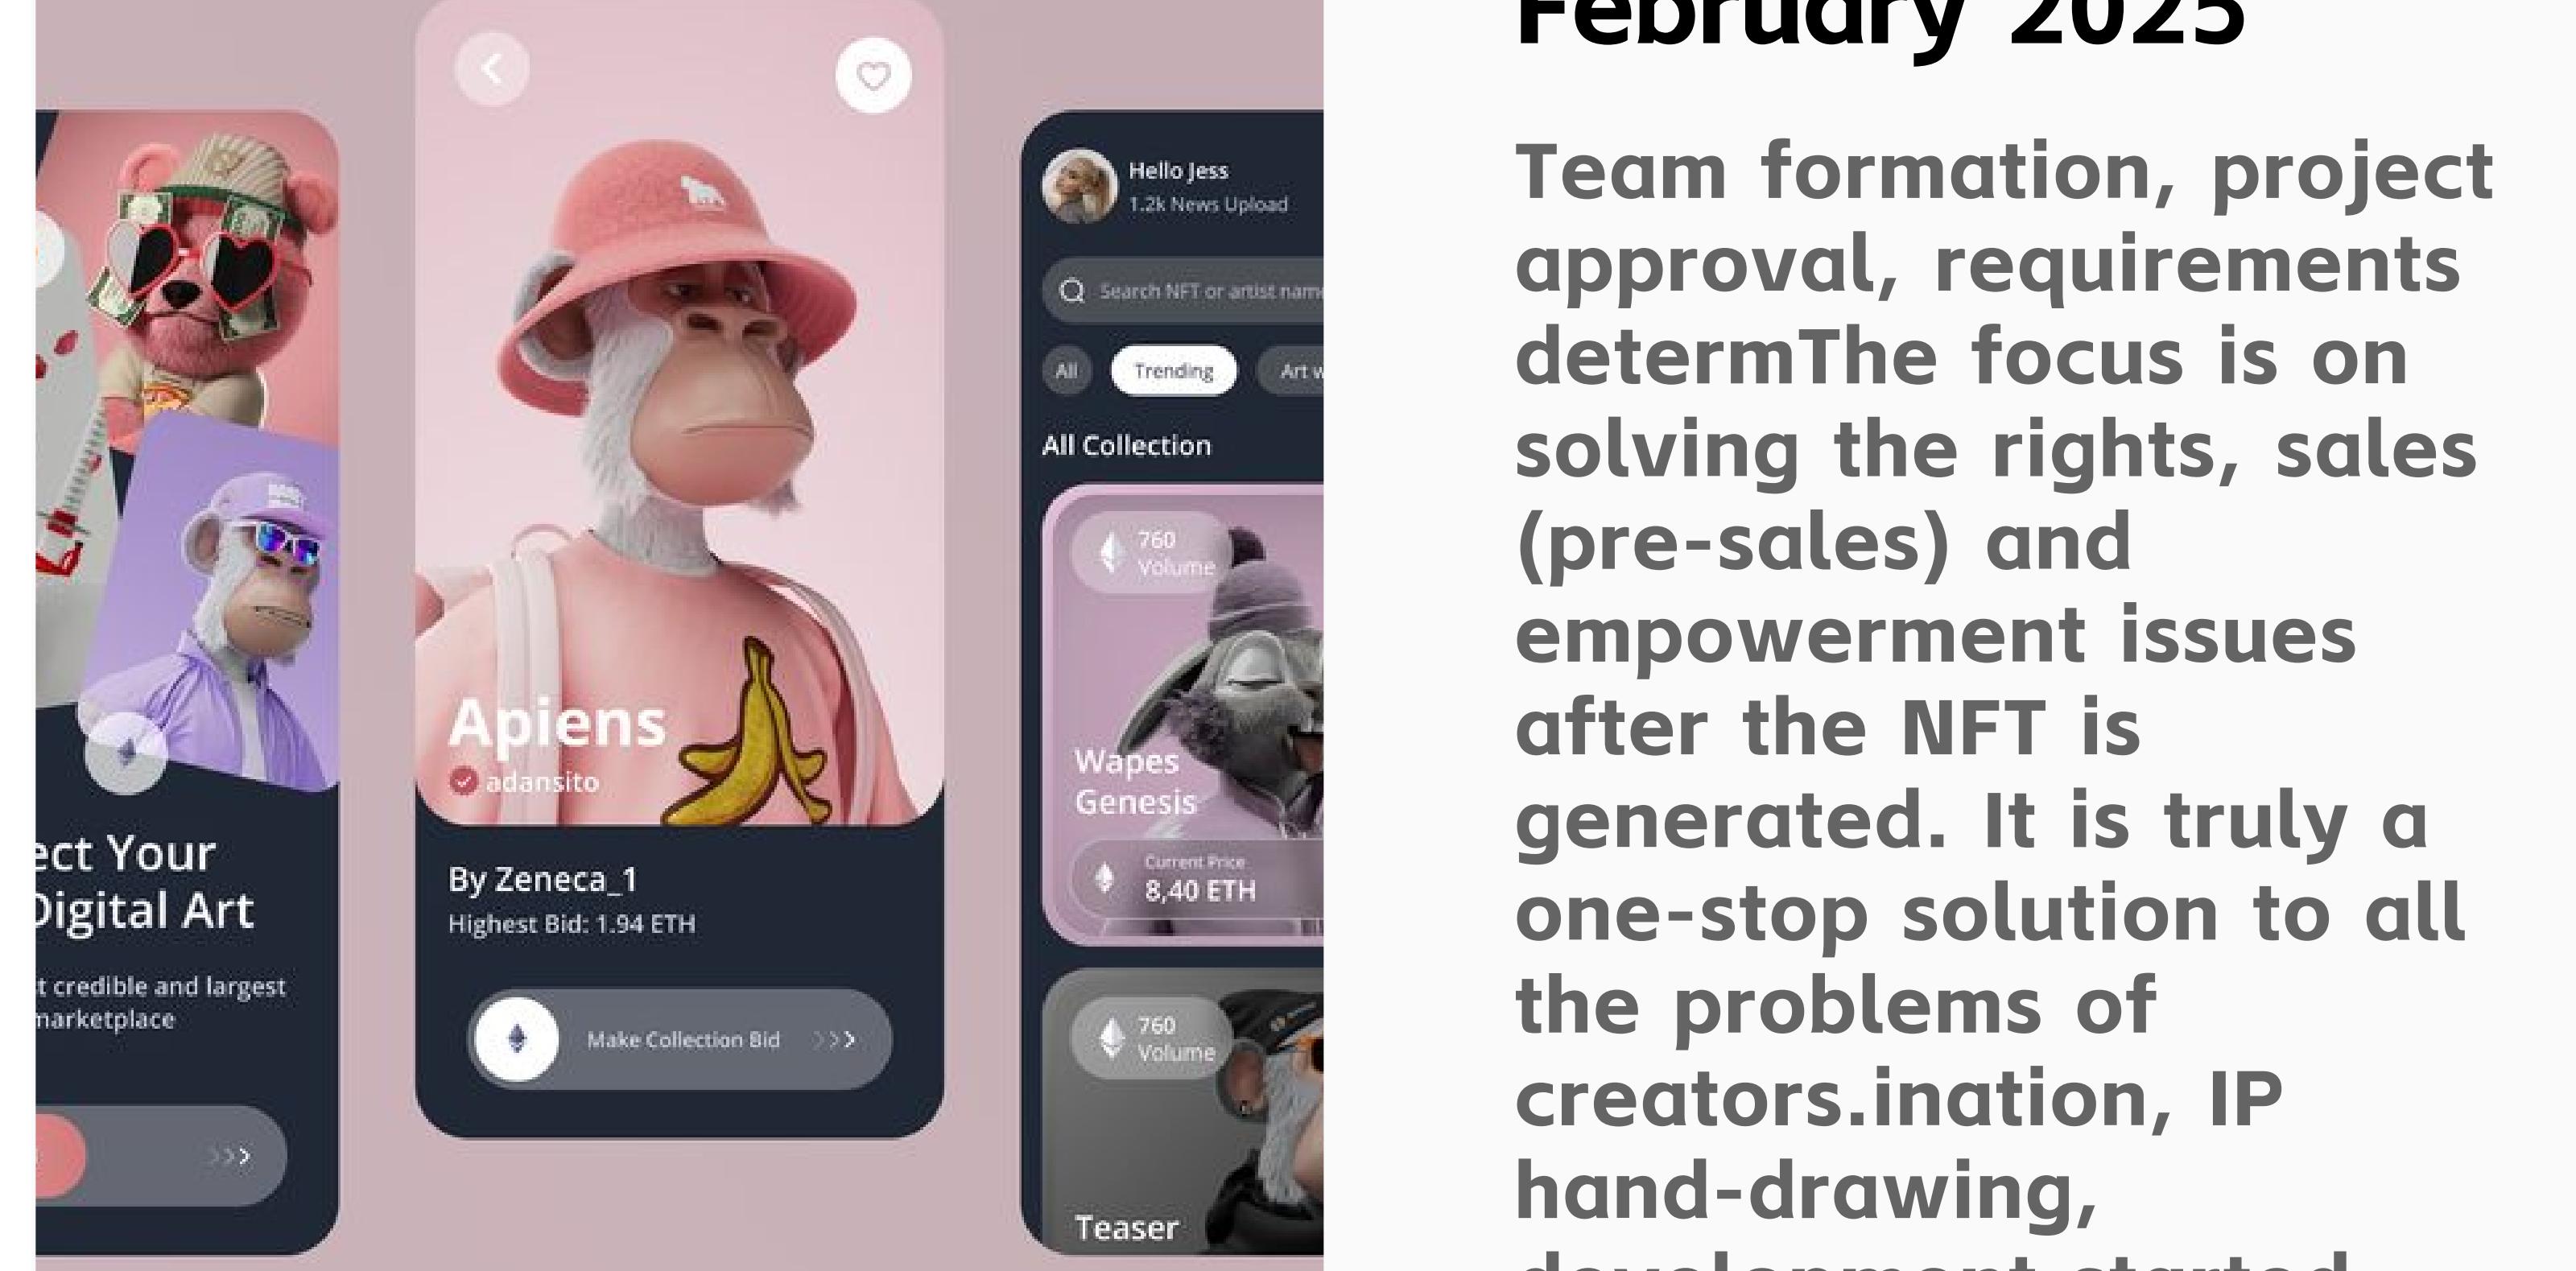

October 2024

Develop NFTX 2.0. Goal: Allow people who don't understand technology to freely import the designer's design, automatically disassemble the elements after importing, and automatically generate a page that can be minted.

December 2024

Excellent applications on the BTC network are scarce. Increase support for the BTC network. Import BTC's high-quality assets and users into NEOX

February 2025

Team formation, project approval, requirements determination, IP hand-drawing, development started
